

Specification SHS_v21

YARDMASTER® SHORE MOUNTED STIRRER

- With a developing need to keep a good solid/liquid mix, the Yardmaster range of stirrers have become a key element of many effluent systems
- Using a 4-pole motor, the Yardmaster stirrer runs through reduction pulleys to do approximately 400rpm at the propeller
- Standard stirrer lengths of 7.5m and 9.9m
- Incline angle adjustment done with ease via the winch
- Slew angle adjustment
- Above ground frame mounting
- Easy installation and servicing
- 7.5kW and 11kW options
- Designed and manufactured in New Zealand for New Zealand conditions

Ideal for...

Applications where floating frames are not preferred
