

Effluent Products Specification RHW\_v25

# Wash Down System

The Reid & Harrison Wash Down System comprises a high volume pump and a number of fixed outlets. The outlets, used one at a time, can swivel 360 degrees, enabling the operator to wash a vast area from the one point. The only requirement is a water storage tank located near the pump.

## Features

- The Wash Down System uses volume rather than pressure
- Reduces wash time by up to 90%
- Uses NO MORE water than conventional methods
- Simple to operate

## Ideal For

All yards, including multiple slope yards. Steep sloping yards are no longer necessary
